

# VisorProtect

lightweight face shield

## Assembly instructions

- 1:** Insert and press home one of the inside poppers through the VisorProtect hole. **See figure a**
  - 2:** Cut elastic to approximately 60cm in length and place between the VisorProtect and headband inner on its outside edges. **See figure b**
  - 3:** Fold the headband around the visor and gently press along the outer popper onto its inner friend. Make sure the elastic is trapped in the fold and tie off. **See figure c**
  - 4:** Repeat on the opposite VisorProtect edge but try on and adjust to suit before tying off.
- N.B.** Trim the VisorProtect with scissors to suit your face length.
- 5:** Once used remove elastic and place in recycling.

**Please note elastic contains trapped internal latex.**
